

Wireless Video Intercom System

iCom

iCOM is a new technology that offers mobility, comfort, freedom of movement and efficiency in your office or at home.

Someone is at the front door or gate and is ringing. You don't have to walk to any wall fixture or to the door to see who it is.

The portable units will show you the caller. You can talk and view the caller from the comfort of your seat. If you decide to let the caller in, just press a button to open the door. (electric door lock not provided)
